Just a few tweaks...the RCRA Agreements should be called RCRA Orders. Also, the RCRA Order at Oceana does not apply to Fentress.

Hi Mike, attached is the information requested on PFAS communication.

From HSCD's perspective, this is not a comprehensive list of all sites with PFAS contamination present. Based on the information request, we only included those sites with PFAS contamination that have "recent media interest" which we interpreted as media interest in 2017.

If you need additional information, please let me know.

Susanne,

Here's your file back with WPD's input on the other R3 sites. Please let me know if you have any questions.

Mike,

It's almost done.

Steve is down in DC. Susanne Haug sent me HSCD's compilation this morning. I'll add WPD's input and will send it back for HSCD management to review prior to them sending you the compiled info by tomorrow.

Steve,

Checking on the status of this assignment.

As you may recall, we ended up meeting right after I sent this message and you agreed to gather info from previously completed documents and then were going to share with WPD for their input.

Thanks.

Mike

Rick and Steve,

As discussed at today's meeting.

I will schedule a quick mtg/call to discuss easiest way to respond.

Thanks.

Mike

Hi everyone:

Thanks for all the great feedback so far. I've been asked about a deadline for information, which of course is important.

If we could have the first round of information by **August 25**, that would be fantastic.

Thanks!

Lahne

Subject: PFAS communications coordination

Hi everyone:

Thanks for the call earlier.

To recap, we (Office of Science Advisor/ORD) are coordinating efforts to gather and communicate information related to all PFAS chemicals (traditional C8 and the newer replacement C6 chemicals) to the administrator and among ourselves (regions/program offices).

If you wouldn't mind providing the following basic information:

- Region
- Issue location – overall issue characterization (eg city/town and drinking water or superfund etc)
- Who is the lead (EPA? County? State emergency management? Etc)
- What is EPA doing in this specific instance?
- Are there other program offices/regions involved?
- Is there press coverage currently? (if you have links, please provide to current news)

As far as historic – I think we can stay current within the last year – unless there is a high profile superfund or other site in your region that consistently is in the press.

For looking forward, I think it's important to list every incident – even if there's no press. For example, the Gen X issue in NC was known before the press started covering it. We'd like to stay ahead of those if possible.

In addition, **please provide a contact person/persons for your region for PFAS issues.** The list below was not identified by communications, so please feel free to update.

Here's who was identified so far:

9	Allenbach	Becky	R4
11	Caporale	Cindy	R3
13	Cassidy	Meghan	R-1
15	Harris	Kim	R5
25	Pepich	Barry	R10
48	Benson	Bob	R8
49	Carter	Bobbi	R4

Please send everything to both me and Nancy. If you have any questions, let me know.
I will come to the 12:30 calls once a month as well so we can discuss anything as needed.

Thanks so much for your coordination and I look forward to working with you.
